Results

In Q2, the loss for the quarter totalled NOK -125.7m against a profit of NOK 53.8m in Q2 2018. The weak result is driven by a weak technical result and a weak return on investments.

The Grenfell Tower claim hits the result by approx. NOK 75m. The technical result is weak even without the NOK 75m one-off. Price increases came too late and with too little and price and profitability measures going forward will be further strengthened in the Nordic region.

The net combined ratio was 107.2%, 8 percentage points higher than the 99,2% reported in Q2 2018.

The net combined ratio by country was:

Net combined ratio	Q2 2019	Q2 2018
Norway	91,6 %	96,5 %
Sweden	99,1 %	85,2 %
Denmark	109,5 %	108,6 %
UK	155,0 %	73,2 %
Finland	147,7 %	129,6 %
Total	107,2 %	99,2 %

In Q2 the company had run-off losses of 9.7%. Exclusive the Grenfell Tower claim the company had run-off losses of 2.3%.

The claims ratio for own account increased from 95.8% in Q2 2018 to 98.8 % in Q2 2019. The claims ratio is driven by the Arbitration loss, high claims inflation within Motor in the Nordic countries and a loss ratio on large claims higher than normalized.

The expense ratio for own account amounted to 8.4%, up from 3.3 % in Q2 2018. The increase is due to significant reductions in reinsurance commissions due to change in reinsurance structure (from Surplus to Risk XL on property). Strong growth in Sweden and the UK drives also broker commissions upwards.

In H1, the loss for the half-year totalled NOK -33.8m against a profit of NOK 51.4m in H1 2018. The net combined ratio was 106.6%, compared to 96.0% in H1 2018.

The net combined ratio for the half-year by country was:

Net combined ratio	H1 2019	H1 2018
Norway	96,5 %	104,2 %
Sweden	99,3 %	78,9 %
Denmark	112,9 %	96,8 %
UK	139,9 %	92,1 %
Finland	124,8 %	133,6 %
Total	106,6 %	96,0 %

In H1 the company had run-off losses of 1.9%. Exclusive the Grenfell Tower claim the company had run-off gains of 2.0%.

The gross expense ratio was 8.2% down from 8.6% in H1 2018, whilst the net expense ratio was 7.6%, up from 0.6%. The low net cost ratio in 2018 comes from a high level of reinsurance commissions.

Investment return

Net investment portfolio amounted to a total of NOK 10.896m at 30 June 2019, up 4.2% compared to the portfolio end of Q2 2018.

Investment activities yielded a total negative return of NOK -69,3m, or -0.6% compared to a return of NOK 112,3m or 1.1% in Q2 2018. Equities accounted for a NOK 122,0m loss (-10.1%) against a NOK 75.4m gain (4.5%) in Q2 2018. Return on the fixed income portfolio totalled NOK 52,7m or 0.5% against NOK 36.9m or 0.4% in Q2 2018.

In H1, the investment result was NOK 41.9m (0.4%) against NOK 114.8m (1.1%) in H1 2018. Equities accounted for a NOK 69.7m loss (-6.2%) against NOK 32.8m gain (1.9%) in H1 2018. The return on the fixed income portfolio totalled NOK 111.7m or 1.2% against NOK 82.0m or 1,0% in H1 2018.

End of Q2 2019, 10,3% of Protector's financial assets were invested in equities, against 9.9% year end 2018.

Equity and capital position

The company's equity amounted to NOK 1,988.0m at the end of the quarter. End of Q2, the solvency capital requirement (SCR) ratio using the standard formula was 164%, which is within the company's risk appetite but weaker than the SCR ratio year end 2018. The company's long term objective is to maintain a SCR-ratio (calculated according to the Solvency II regulations) above 150 %.

Protector has a BBB+ rating from A.M. Best.

Prospects

The technical result is weak even without the Grenfell Tower claim. Price and profitability measures implemented have come too late and are not sufficient. Going forward, price increases and other profitability measures will be further strengthened in the Nordic countries and the technical result is expected to be improved.

Claims development, and the inherent volatility of capital markets, are continued to be the most important risk factors that could affect the company's profit in 2019.

Discontinued operations

Protector decided in 2018 to exit the COI market due to the product's recent years weak technical performance, and due to the significant uncertainty related to the product's future premium development and profitability. After the decision to exit the COI market, COI is defined as "discontinued operations" in the accounts. Net profit and assets and liabilities associated with COI are presented on separated lines as discontinued operations.

Protector has in July 2019 entered into a 50% quota share agreement (reinsurance) for the entire COI portfolio. The quota share agreement includes the historical portfolio as well as all new business written until the policy writing cease.

The fair value of listed investments is based on the current sales price. Financial instruments measured at fair value are valued on a daily basis. Directly observable prices in the market are used as far as possible. The valuations for the different types of financial instruments are based on recognised methods and models.

Level 1: Financial instruments valued on the basis of quoted prices for identical assets in active markets

This category encompasses listed equities that over the previous three months have experienced average daily trading equivalent to approximately NOK 20 million or more. Based on this, the equities are regarded as sufficiently liquid to be included at this level. Bonds, certificates or equivalent instruments issued by national governments are generally classified as level 1.

Level 2: Financial instruments valued on the basis of observable market information not covered by level 1

This category encompasses financial instruments that are valued on the basis of market information that can be directly observable or indirectly observable. Market information that is indirectly observable means that the prices can be derived from observable related markets. Level 2 includes shares or equivalent equity instruments for which market prices are available, but where the volume of transactions is too limited to fulfil the criteria in level 1. Shares in this level will normally have been traded during the last month. Bonds and equivalent instruments are generally classified in this level. Foreign exchange derivatives are classified as level 2. Fund investments are generally classified as level 2.

Level 3: Financial instruments valued on the basis of information that is not observable in accordance with level 2

If one or more of the key parameters in a valuation model is not based on observable market data,
